PROFESSIONAL EXPERIENCE

Web Development & Technical Projects | Self-employed | Remote

January 2025 – Present

Pursuing hands-on technical upskilling in modern web technologies and AI-assisted development tools to strengthen digital fluency, adaptability and structured problem-solving.

- Completed intensive training in modern web technologies (React, JavaScript, HTML, CSS) through bootcamp and self-directed learning. Built multiple projects (mmfportfolio) demonstrating commitment to staying current with technology trends
- Built and deployed CalorieIQ (calorieiq.ro), an AI-powered nutrition platform, managing the full project lifecycle: using AI tools (ChatGPT, Claude) and coordination with backend development, quality review and deployment

Team Manager | Nokia | Timisoara, Romania

February 2022 - August 2024 (2 years 7 months)

Led cross-functional team of 15+ engineers in telecommunications software development.

- Managed team scheduling, workload planning, and resource allocation
- Tracked and reported KPIs: delivery timelines, quality metrics, team productivity
- Served as primary interface between engineering teams and senior leadership
- Facilitated collaboration between development, testing, customer care, and international teams

Fault Manager / Agile Product Owner | Nokia | Timisoara, Romania

November 2019 - February 2022 (2 years 3 months)

Product Owner and critical issue coordinator managing product backlog and facilitating communication between technical and business teams.

- Managed and prioritized product backlog ensuring alignment with business objectives
- Facilitated cross-functional meetings and ensured clear documentation of decisions and action items
- Managed critical issue escalations and coordinated resolution task forces
- Monitored performance indicators and prepared progress reports for stakeholders
- Acted as communication bridge between technical teams and business representatives

Software Engineer | Nokia | Timisoara, Romania

July 2015 - November 2019 (4 years 5 months)

- Supported development and testing activities within a Linux-based environment
- Participated in team coordination meetings and technical documentation processes
- Investigated and resolved complex customer-reported issues
- Used structured tracking systems (Jira, Git, SVN) to manage tasks and documentation
